MOBILE COLUMN
EXTREME PERFORMANCE TOTAL FLEXIBILITY

The John Bean® Mobile Column Lift System is the ideal lift solution for transport fleets, schools, government, and military applications.

Our heavy-duty Mobile Column Lifts support the vehicle to a height of six feet, allowing mechanics to work comfortably, eliminating the risks of standing or lying in uncomfortable positions.

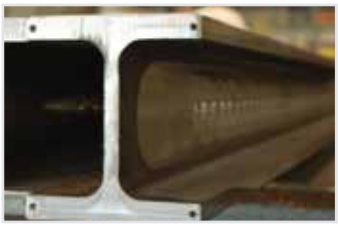

The adjustable universal carriage accommodates wheels up to 59 inches in diameter without additional accessories.

The sleek and efficient MCL design provides optimal space for technicians to work around the columns, and each set of Mobile Column Lifts can be conveniently stored in a small area when not in use.

Our solid steel I-Beam design can safely hold substantial weight without bending and is easier to move than bulky hydraulic columns.

Be FAST

MOBILE COLUMN
HEAVY-DUTY LIFT

STRONG AND SOLID I-BEAM SUPPORT COLUMN

Our main support column is the only true solid, one-piece I-Beam on the market. Our I-Beam column guarantees no welding seams, therefore increasing rigidity and stability by eliminating any risk of weak points or mechanical failure.

HYDRAULIC JACK TROLLEY

The hydraulic jack trolley allows users to position the Mobile Column in just minutes, resulting in a faster turnaround time.

UNIVERSAL CARRIAGE

Adjustable universal carriage with lifting forks that accommodate tire diameters up to 59 inches.

EASY TO OPERATE

LED display with auto diagnostics makes the Mobile Column Lift simple to operate. No master column is needed, with three operation modes. Built-in automatic synchronization feature keeps lifts level and secure at all times.

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.
