

JLDS 3500

ROBUST DESIGN ESSENTIAL SERVICE

The John Bean® JLDS 3500 Double Scissor Lift is one of the most robust double scissor lifts in the market, with 3.500 kilograms of lifting capacity, ideal for workshop lifting and service operations. The versatile design works as a reception bay, ideal for brake, exhaust, oil, and tyre services.

This lift can be installed as a surface or flush mount for optimal shop configuration. The adjustable lifting platforms easily accommodate longer wheelbase vehicles with ramps that lock to extend the platform 33 centimetres on each side and hinge down, allowing access for wheel service. The low platform drive-over height will enable vehicles with low chassis to drive onto the lift without damaging the undercarriage.

The compact control unit console houses vital electrical components, hydraulic power and synchronisation controls, protecting them from shop elements. The scissor operates on a hydraulic system, eliminating the need for compressed air to lock and unlock the structure mechanically. Two independent hydraulic circuits provide safe and controlled lowering and cylinders with internal flow control valves.

The JLDS 3500 Double Scissor Lift from John Bean is an essential tool for your workshop lifting and service needs.

Be EQUIPT

DOUBLE SCISSOR LIFT

DRIVE-ON RAMPS

The ramps extend to provide an additional 33 centimetres on each side with easy lock/unlock and hinge down and away by 54 degrees to allow access to wheel service areas.

HYDRAULIC SYSTEM

Hydraulic cylinders with internal flow control valves and two independent hydraulic circuits provide safe and controlled lowering. The master/slave system avoids the need for compressed air to lock/unlock the scissor structure.

ADJUSTABLE PLATFORMS

Our adjustable lifting platforms with locking ramps extend from 147-214 centimetres to accommodate longer wheelbase vehicles. The low drive-over height provides safe loading for vehicles with low chassis.

CONTROL UNIT

The compact control unit protects critical electrical components, hydraulic power pack and hydraulic synchronisation controls.

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.

JLDS 3500

TECHNICAL SPECIFICATIONS

Lifting Capacity	7,000 lbs. 3,500 kg
Configuration	Open Front
Overall Width	72"-80" 183-203cm
Overall Height	Flush Mount: 70.5" 179cm Surface Mount: 75" 191cm
Max Lifting Height	Surface Mount: 75" 191cm
Lifting Time	48 seconds
Power Requirements	400V 3Ph 50/60 Hz
Air Supply Required	N/A

STANDARD ACCESSORIES

- Stackable Interlocking Pads
1.7" | 44mm

OPTIONAL ACCESSORIES

- Low Profile Ramps
- Flush Mount Kit
