

14K SCISSOR

ENHANCED EFFICIENCY SUPERIOR PERFORMANCE

Safety is a top priority for John Bean®; the 14k Scissor Lift utilizes features like mechanical locking with a pneumatic safety lock, flow sensing valves, and a redundant hydraulic safety system. A 14,000-pound lifting capacity powered by four hydraulic cylinders gives the power to hoist up everything from a passenger vehicle to a heavy-duty truck.

The Locked & Lighted model provides additional productivity features to make the 14k Scissor Lift the ultimate tool for any alignment job. Our low-maintenance rear slip plates contain an encapsulated bearing system that minimizes the entry of debris. The approach ramps with end sliders minimize costly floor damage while reducing noise in the shop.

The John Bean 14k Scissor Lift is a space-saving alignment lift ready to serve your shop's alignment needs.

Be **PRECISE**

SCISSOR ALIGNMENT LIFT

LOCKED & LIGHTED

Locked & Lighted models provide enhanced performance allowing the technician to perform critical tasks while minimizing alignment process operations by illuminating inspection and adjustment areas and sequencing the locking of alignment plates.

OPEN FRONT AND REAR CONSTRUCTION

Perform alignment and inspection services quickly and accurately and reduce technician fatigue with our open front and rear construction design. This productivity-boosting design allows technicians to enter the front or rear of the vehicle without stooping down to get under the lift structure.

FLUSH OR SURFACE MOUNT

Maximize your available workspace with a flush-mount installation that can recess right into your shop floor when not in use.

ULTRA-WIDE RUNWAYS

Precisely perform alignment procedures on wide wheelbase vehicles with our 26-inch, pro-style runways.

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.
