B100

TRUSTED PERFORMANCE RELIABLE SERVICE

The John Bean® B100 is an easy-to-navigate semi-automatic wheel balancer that helps technicians get through the balancing process effortlessly and add more business to the shop.

Small in size, but equipped with features, the B100 can fit virtually anywhere in the shop.

With an integrated digital display to assist technicians through the wheel balancing process, the B100 allows for easy operation, helping technicians to measure wheels and quickly move through a balancing cycle.

A protective wheel cover adds safety during the operation and keeps the technician protected from flying objects.

Increase your profits and keep valuable wheel service business in-house with the John Bean B100 wheel balancer.

SEMI-AUTOMATIC INTEGRATED DIGITAL WHEEL BALANCER

QUICK NUT WHEEL CLAMP

An easy-to-use manual clamping device that allows a secure attachment of the wheel to the balancer shaft.

SEMI-AUTOMATIC DATA ENTRY

Hand-operated gauge arm with easyALU™ assisted rim data entry for diameter and distance. Touch the rim with the gauge arm to enter the rim dimensions and automatically select the weight balancing mode.

WHEEL COVER

The wheel cover prevents objects from flying, protecting technicians from possible accidents.

SPLIT WEIGHT MODE

This feature allows for accurate balancing with easy-to-follow manual procedures to hide the weights behind the spokes, preserving the wheel's visual presentation.

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.

JohnBean®

B100

INTEGRATED DIGITAL LED DISPLAY

Ergonomic weight-tray-integrated touchpad operation with intuitive LED display.
