

JLF 4000

CONVENIENT FLEXIBILITY PRACTICAL UTILITY

The John Bean® JLF 4000 Four-Post Lift provides a lifting capacity of 4.000 kilogrammes for wheel alignment of passenger cars, SUVs, transporters up to mid-size vans with a wheelbase range of 193-415 centimetres.

Besides the wheel alignment application, the lift is also suited for service repairs as the technician has full access to all areas under the car. Perform brake service using the optional jack as well. Mechanical safety locks in the four posts prevent the platforms from suddenly dropping in case of hydraulic failure, ensuring operator safety.

Used with a John Bean 3D wheel aligner, the JLF 4000 Four-Post offers the perfect combination for wheel alignment service on nearly any vehicle.

JLF 4000 with optional Jack

FOUR-POST ALIGNMENT LIFT

RAMPS

The ramps are 106 centimetres long, making the drive-on angle of 10 degrees possible and keeping the overall length of the complete lift below 640 centimetres.

CONTROL UNIT

Simple and easy to understand, with emergency switch and comfort lowering, which allows the automatic release of the carriage from the safety lock when lowering the lift.

SAFETY LADDER

The lift is equipped with safety locks every 10 centimetres to set the runways in the locked position for wheel alignment.

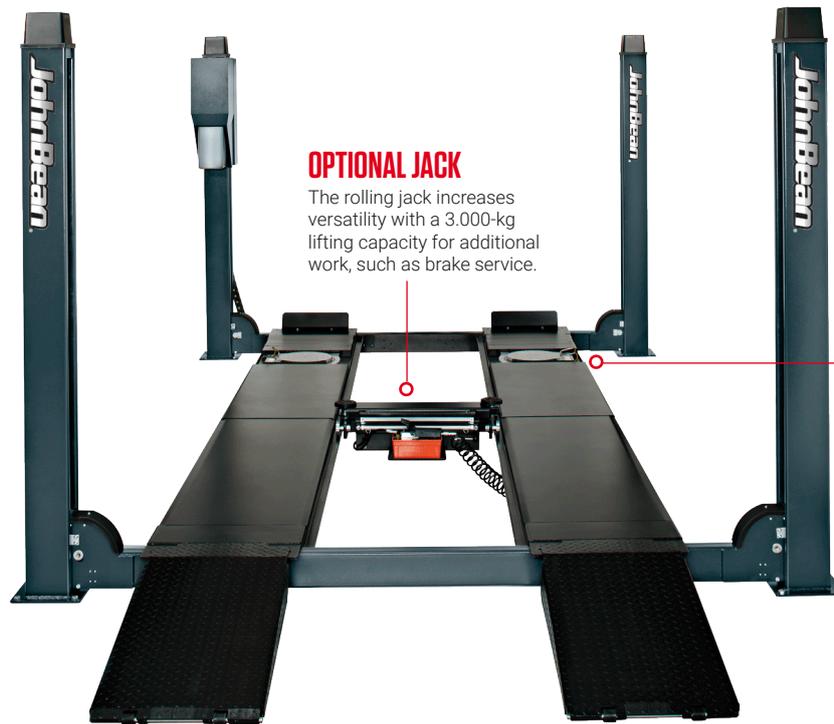

REAR SLIP PLATES

The integrated rear slip plates guarantee that a four-wheel alignment can be performed on all vehicles with wheelbases from 193-415 centimetres. For best sliding performance, each slip plate has three sections with a total of 120 rollers.

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.

OPTIONAL JACK

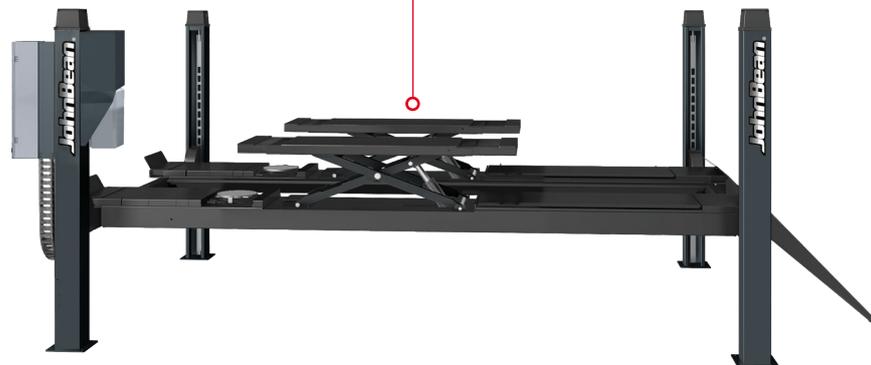

The rolling jack increases versatility with a 3.000-kg lifting capacity for additional work, such as brake service.

OPTIONAL TURNTABLES

The turntables are perfectly integrated into the runways and can be placed in three different positions to support a wide range of wheelbases.

INTEGRATED WHEEL-FREE LIFT (WFL VERSION)

The integrated wheel-free lift eliminates the need for a jack (although one may still be used if desired) and boasts a platform length of 1.500mm, with optional 200mm and 300mm extensions.

TECHNICAL SPECIFICATIONS

Lifting Capacity	8.800 lbs. 4.000 kg
Max Lifting Height	73" 185cm
Wheel-Free Lift Capacity	8.800 lbs. 4.000 kg
Wheel-Free Lift Rise Height	18" 45cm
Runway Length	208" 529cm
Runway Width	25" 63cm
Lifting Time	70 seconds
Power Requirements	400V 50 Hz 3Ph

OPTIONAL ACCESSORIES

- Turnplates
- Jack Beam
- Drive-Over Ramps for Flush-Mount Installation
- Turntable Covers
