

MTF 4000C

VERSATILE POWERHOUSE

Designed for precision-focused workshops, the MTF 4000C sets a new standard in electro-mechanical lifting by delivering outstanding reliability and accurate control. Built with a robust 4,000 kg lifting capacity, this advanced John Bean® solution is tailored for modern service bays—providing the strength and adaptability to manage everything from passenger cars to SUVs and vans with confidence.

The MTF 4000C incorporates hot-rolled steel profile columns angled at 30° to improve door clearance. Its compact yet durable design features roll-formed columns fitted with a rubber protective strip shielding against sparks generated during welding or repair work on the lift. The lifting arms attach to the carriage through a reinforced heavy-duty pin housing, ensuring smooth, bidirectional arm movement for maximum flexibility.

TWO POST AUTOMOTIVE LIFT

DURABLE CARRIAGE

The MTF 4000C carriage is guided via six maintenance-free rollers inside the columns that do not wear out like plastic sliding blocks.

LOAD/SAFETY NUT

The MTF 4000C incorporates a durable bronze alloy load nut paired with a cast alloy safety nut, delivering long-lasting performance and superior wear resistance compared to nylon alternatives.

CABLE BRIDGE

The overhead cable bridge neatly routes the power supply cable, motor electronic synchronisation cable, and thermo switch cable—helping eliminate trip hazards and maintain a safer, cleaner workspace. Its adjustable height design allows easy adaptation to different workshop layouts and vehicle types.

3-STAGE ARMS

The MTF 4000C is equipped with four extended 3-stage lifting arms, offering an adjustable range of 722 to 1,300 mm to accommodate a wide variety of vehicles.

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.

MTF 4000C

CONTROL UNIT

Operation is managed through a reversible switch, which can be secured with a standard padlock to prevent unauthorised use and enhance safety.

CE STOP

An audible safety alert automatically stops lowering at 200mm, protecting operators and eliminating the need for bulky footguards.

TECHNICAL SPECIFICATIONS

Lifting Capacity	4.000 kg
Installation Width	3.400 - 3.500 mm
Height without cable bridge	2.561 mm
Height with cable bridge	4.1 mm
Lifting Height	1.930 (+30) mm
Drive through width	2.277 - 2.377 mm
Motor power	2 x 2,5 kW
Power Supply Voltage	400V

STANDARD ACCESSORIES

- Tool Storage Trays
- Pick-up pad extensions 50mm/100mm/150mm
- Electric vehicle adaptors
- Pick-up pads for crafter & sprinter 100mm
