

T1300B

PROVEN DESIGN FUNDAMENTAL VALUE

Built to get the job done without taking up space, the John Bean® T1300B utilises a proven design that includes the features you need to get the job done right.

The T1300B swing-arm design helps technicians perform core tyre-changing operations quickly and efficiently in a small footprint. An ergonomically positioned pedal operates the traditional side-shovel bead breaker that makes easy work of a variety of tyre types.

Self-centring jaws securely clamp the wheel with the proper setup range, and the highly effective top-side bead seater utilises compressed air to seat the tyre to the rim.

Ergonomic, simple to use, and remarkably productive; the T1300B is the swing arm tyre changer that gets the job done.

SWING-ARM TYRE CHANGER

SWING-ARM

The mounting arm swings to the side so that the machine can be installed in a space-saving way directly near a wall.

ON-FLOOR BEAD BREAKER (PEDAL-OPERATED)

Traditional side-shovel bead breaker with ergonomic pedal-control positioned away from the shovel; the fastest solution for standard, soft sidewall, and high-aspect tyres

TOP-SIDE BEAD SEATER

This ergonomic hand-held nozzle injects a high-speed blast of air into the tyre to raise the bead and seal the tyre to the rim.

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.
